

Quick Setup Guide

DMR-EZ475V

Panasonic®

- Before making any connections, turn off all equipment.
- For details on the benefits and limitations of different types of connections, please refer to pages 55 to 61 in the Operating Instructions.

Connection

For Higher Picture Quality with HDMI Terminal → opposite side of this page

A Connecting to a TV

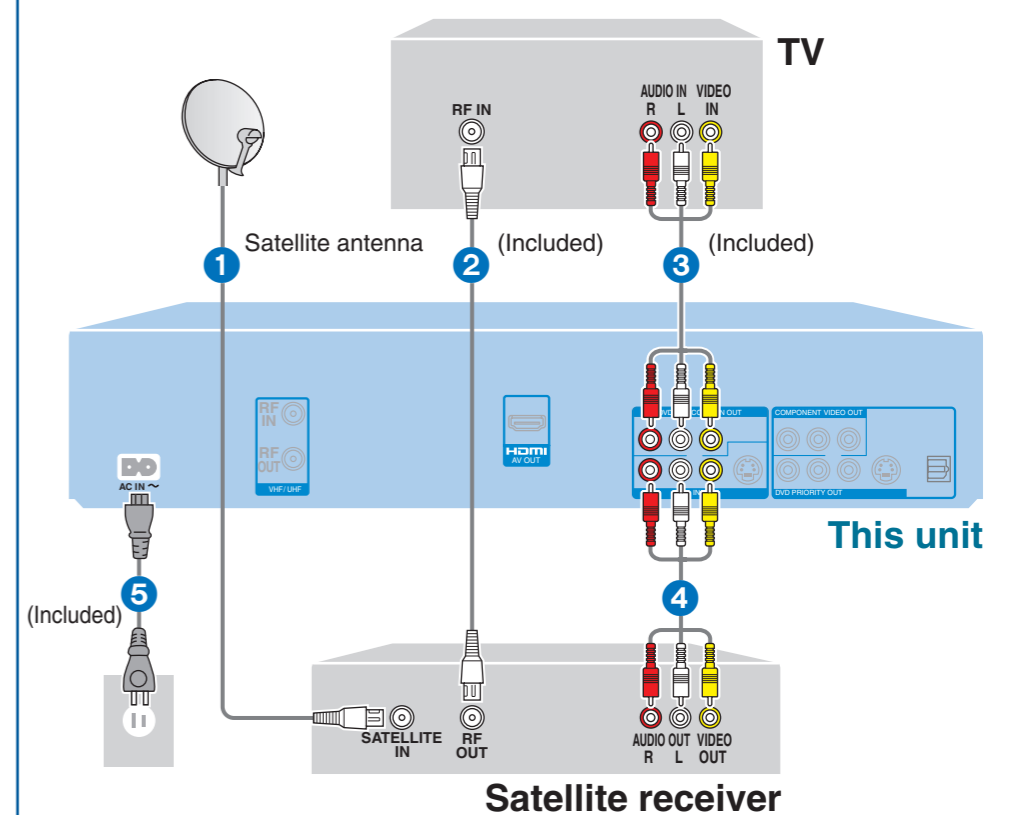

- If your television does not have Audio/Video IN terminals, step 3 may be disregarded, although the use of AV connections is recommended for improved picture quality.

B Connecting to a TV and a Cable Box

C Connecting to a TV and a Satellite Receiver

Connecting with an HDMI (High Definition Multimedia Interface) Terminal

HDMI is the next-generation interface for digital devices. When connected to an HDMI compatible unit, an uncompressed digital audio and video signal is transmitted, enabling you to enjoy high quality, digital video and audio with just one cable. When connecting to an HDMI-compatible HDTV (High Definition Television), the output can be switched to 1080p, 1080i or 720p HD video.

- Please use the HDMI cables 5.0 meters (16.4 ft.) or less.
- We recommend connecting to the TV with the DVD/VHS COMMON OUT terminals as well.

- Set the TV input to HDMI in step 2 (→ right) and the RF output channel to “OFF” in step 4 (→ right).
- Set “HDMI Video Output” and “HDMI Audio Output” to “On” (The default setting is “On”). (→ page 51 in the operating instructions).

For details on the benefits and limitations of different types of connections, please refer to pages 55–61 in the Operating Instructions.

■ EZ Sync™ “HDAVI Control™”

What is EZ Sync “HDAVI Control”?

EZ Sync “HDAVI Control” is a convenient function that offers linked operations of this unit, and a Panasonic TV (VIERA) or receiver under “HDAVI Control”. You can use this function by connecting the equipment with the HDMI cable.

With “HDAVI Control” you can achieve:

- Automatic input switching: The input channel will be automatically switched when the TV is on and you operate this unit.
- Power on link: The TV will be automatically turned on when the TV is off and you operate this unit.
- Power off link: This unit will be automatically turned off when you set the TV to off.
- Easy control only with VIERA remote control: You can operate this unit with the TV (VIERA) remote control.

For more details, (→ pages 32 and 33 in the operating instructions).

Initial Settings

Preparing the TV

Using your TV's remote control

- 1 Turn the TV on.
- 2 Switch to channel 3.

3 Turn this unit on.

4 Select an RF output channel number 3.

When the picture on the TV is poor, switch the TV to channel 4. Also change this unit's front display to CH4.

When nothing is displayed, change the TV channel to video input. Then turn this unit's front display to “OFF”.

- To return to the previous screen
RETURN

5 Select the language.

- If you make a mistake, press RETURN.

6 Select the type of TV you are using.

7 Set Quick Start to “On” or “Off”.

8 Select whether to receive TV signal from the unit's RF IN terminal or not.

- If you select “No”, you can proceed to “Set Clock Manually” (→ step 10, below).

9 Select “Antenna” or “Cable”.

- Press [ENTER] to start automatic clock and channel setting.

10 Complete the settings.

- If the correct time is displayed

- If the clock setting screen appears.

- Please refer to “Basic Operations” (pages 6 to 12) in the operating instructions.
