IMPORTANT SAFETY INSTRUCTIONS

Your safety and the safety of others are very important. We have provided important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol. It is used to alert you to potential hazards that can kill or hurt you and others. All safety messages will follow the safety alert symbol and either the word “DANGER”, “WARNING” or “CAUTION”. These words mean:

DANGER
You can be killed or seriously injured if you don’t immediately follow instructions.

WARNING
You can be killed or seriously injured if you don’t follow instructions.

CAUTION
You can be exposed to a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

(a) **DO NOT** attempt to operate this oven with the door open, since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

(b) **DO NOT** place any object between the oven front face and the door, or allow soil or cleaner residue to accumulate on sealing surfaces.

(c) **DO NOT** operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:

1. door (bent),
2. hinges and latches (broken or loosened),
3. door seals and sealing surfaces.

(d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

Thank you for purchasing a Panasonic Microwave Oven

Your microwave oven is a cooking appliance and you should use as much care as you use with a stove or any other cooking appliance. When using this electric appliance, basic safety precautions should be followed, including the following:

WARNING

To reduce the risk of burns, electric shock, fire, injury to persons, or exposure to excessive microwave energy:

1. Read all instructions before using this appliance.
2. Read and follow the specific “PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY,” above.
3. This appliance must be grounded. Connect only to a properly grounded outlet. See “GROUNDING INSTRUCTIONS” found on page 6.
4. As with any cooking appliance, **DO NOT** leave oven unattended while in use.
5. Install or locate this appliance only in accordance with the installation instructions found on page 6.
6. **DO NOT** cover or block any openings on this appliance.
7. **DO NOT** store this appliance outdoors. **DO NOT** use this product near water (for example, near a kitchen sink, in a wet basement, or near a swimming pool or similar locations).
8. Use this appliance only for its intended use as described in this manual. **DO NOT** use corrosive chemicals, vapors or non-food products in this appliance. This type of oven is specifically designed to heat or cook food. It is not designed for industrial or laboratory use. The use of corrosive chemicals in heating or cleaning will damage the appliance and may result in radiation leaks.
9. When cleaning surfaces of the door and oven that come together on closing the door, use only mild, non-abrasive soaps or detergents applied with a sponge or soft cloth.

10. **DO NOT** allow children to use this appliance, unless closely supervised by an adult. **DO NOT** assume that because a child has mastered one cooking skill he/she can cook everything.

11. **DO NOT** operate this appliance if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.

12. **DO NOT** immerse cord or plug in water.

13. Keep cord away from heated surfaces.

14. **DO NOT** let cord hang over edge of a table or counter.

15. This appliance should be serviced only by qualified service personnel. Contact the nearest authorized service center for examination, repair or adjustment.

16. Some products such as whole eggs, with or without shell, narrow neck bottles and sealed containers (for example, closed glass jars) may explode and should not be heated in this oven.

17. To reduce the risk of fire in the oven cavity:
   - (a) **DO NOT** overcook food. Carefully attend appliance when paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
   - (b) Remove wire twist-ties from paper or plastic bags before placing bag in oven.
   - (c) If material inside the oven ignites, keep oven door closed, turn oven off, and disconnect the power cord, or shut off power at the fuse or circuit breaker panel.
   - (d) **DO NOT** use the cavity for storage purposes. **DO NOT** leave paper products, cooking utensils or food in the cavity when not in use.

18. **Superheated Liquids:** Liquids, such as water, coffee or tea are able to be overheated beyond the boiling point without showing evidence (or signs) of boiling. Visible bubbling is not always present when the container is removed from the microwave oven. THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A UTENSIL IS INSERTED INTO THE LIQUID. To reduce the risk of injury to persons:
   - (a) **STIR THE LIQUID BOTH BEFORE AND HALFWAY THROUGH HEATING.**
   - (b) **DO NOT** heat water and oil, or fats together. The film of oil will trap steam, and may cause a violent eruption.
   - (c) **DO NOT** use straight-sided containers with narrow necks.
   - (d) After heating, allow the container to stand in the microwave oven for a short time before removing the container.

19. **DO NOT** cook directly on the glass tray. It can crack, and cause injury or damage to the oven.

20. For the oven designed for installation into a wall cabinet:
   - (a) **DO NOT** operate any heating or cooking appliance beneath this appliance.
   - (b) **DO NOT** mount unit over or near any portion of a heating or cooking appliance.
   - (c) **DO NOT** mount over a sink.
   - (d) **DO NOT** store anything directly on the top of the appliance surface when the appliance is in operation.

21. Oversized foods or oversized metal utensils should not be used in a microwave/broiler oven as they may create a fire or risk of electric shock.

22. **DO NOT** clean with metal scouring pads. Pieces can burn off the pad and touch electrical parts involving a risk of electric shock.

23. **DO NOT** use paper products when appliance is operated in the broil mode.

24. **DO NOT** store any materials, other than manufacturer's recommended accessories in this oven when not in use.

25. **DO NOT** cover racks or any other part of the oven with metal foil. This will cause overheating of the oven.

**Attention: Hot Surfaces**

---

**SAVE THESE INSTRUCTIONS**

For proper use of your oven, read remaining safety cautions and owner’s manual.
IMPORTANT SAFETY INSTRUCTIONS (continued)

**WARNING**

**Safety Precautions**

**To Avoid the Risk of Shock:**

**Do Not** remove top or outer panel from oven. Repairs must be done only by a qualified service person.

**To Reduce the Risk of Exposure to Microwave Energy:**

**Do Not** tamper with, or make any adjustments or repairs to Door, Control Panel Frame, Safety Interlock Switches, or any other part of the oven. Microwave leakage may result.

**To Avoid the Risk of Arcing Damage or Fire:**

1. **Do Not** operate the microwave oven empty, cook small food portions unattended, or use metal containers. When using the microwave oven without water or food, or cook too small a serving, microwave energy cannot be absorbed and will continuously reflect throughout the cavity. This will cause arcing and damage the oven cavity, door or other components.

2. **Do Not** store flammable materials next to, on top of, or in the oven.

3. **Do Not** dry clothes, newspapers or other materials in the oven, or use newspaper or paper bags for cooking.

4. **Do Not** hit or strike Control Panel. Damage to controls may occur.

5. **Do Not** use recycled paper products unless the paper product is labeled as safe for microwave oven use. Recycled paper products may contain impurities, which may cause sparking.

**Glass Tray**

1. **Do Not** operate the oven without the Roller Ring and the Glass Tray in place.

2. **Do Not** operate the oven without the Glass Tray fully engaged on the drive hub. Improper cooking or damage to the oven could result. Verify that the Glass Tray is properly engaged and rotating by observing its rotation when you press Start. 
   **Note:** The Glass Tray can turn in either direction.

3. Use only the Glass Tray specifically designed for this oven. **Do Not** substitute any other Glass Tray.

4. If the Glass Tray is hot, allow to cool before cleaning or placing in water.

5. **Do Not** cook directly on the Glass Tray. Always place food in a microwave safe dish, or on a rack set in a microwave safe dish.

6. If food or utensil on the Glass Tray touches oven walls, causing the tray to stop moving, the tray will automatically rotate in the opposite direction.

**Roller Ring**

1. The Roller Ring and oven floor should be cleaned frequently to prevent excessive noise.

2. Always replace the Roller Ring and the Glass Tray in their proper positions.

3. The Roller Ring must always be used for cooking along with the Glass Tray.

**To Avoid the Risk of Scalding and Burning:**

**Pot Holders** should always be used when removing items from the oven. Heat is transferred from the HOT food to the cooking container and from the container to the Glass Tray. The Glass Tray can also be very HOT after removing the cooking container from the oven. The wire rack is designed for use in the Convection, Broil, Airfry and Combo modes, and will be hot after use.

**Care in handling the Wire Rack, Enamel Tray and Airfry Basket must be exercised.**
**Installation and Grounding Instructions**

---

**Examine Your Oven**
Unpack oven, remove all packing material and examine the oven for any damage such as dents, broken door latches or cracks in the door. Notify dealer immediately if oven is damaged. **DO NOT** install if oven is damaged.

**Placement of Oven**
1. The oven must be placed on a flat, stable surface, which is more than 36 inches (91.6 cm) height from the ground. Place the front surface of the door 3 inches (7.6 cm) or more from the counter top edge to avoid accidental tipping of the microwave oven during normal use. For proper operation, the oven must have sufficient air flow. **Allow 6 inches (15 cm) of space on the top of the oven, 4 inches (10 cm) at back and 2 inches (5 cm) on both sides.** If one side of the oven is placed flush to a wall, the other side or top must not be blocked. **DO NOT** remove feet.
   - (a) **DO NOT** block air vents. If they are blocked during operation, the oven may overheat and be damaged.
   - (b) **DO NOT** place oven near a hot, damp surface such as a gas or electric range, or dishwasher.
   - (c) **DO NOT** operate oven when room humidity is excessive.
2. This oven is manufactured for household use only. It is not approved or tested for mobile vehicle, marine, or commercial use.

**Installation**
1. **DO NOT** block air vents. If they are blocked during operation, the oven may overheat. If the oven overheats, a thermal safety device will turn the oven off. The oven will remain inoperable until it has cooled.
2. The oven is designed for installation into a wall cabinet by using the proper trim kit available from a local Panasonic dealer, follow all instructions packed with the kit.

**WARNING: IMPROPER USE OF THE GROUNDING PLUG CAN RESULT IN A RISK OF ELECTRIC SHOCK.**
Consult a qualified electrician or service person if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded. If it is necessary to use an extension cord, use only a three-wire extension cord that has a three-prong polarized grounding plug, and a three-slot receptacle that will accept the plug of the appliance. The marked rating of the extension cord should be equal to or greater than the electrical rating of the appliance.

**Grounding Instructions**
**THIS APPLIANCE MUST BE GROUNDED.**
In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.
- **Plug into properly installed and grounded three-prong outlet.**
- **DO NOT** remove ground prong.
- **DO NOT** use an adapter.

---

**Power Supply**
1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
2. Longer cord sets or extension cords may be used if care is exercised in their use. **DO NOT** let cord hang over edge of a table or counter.
3. If a long cord or extension cord is used,
   - (1) The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the appliance.
   - (2) The extension cord must be a grounding-type 3-wire cord, and
   - (3) The longer cord should be arranged so that it will not drape over the counter top or tabletop where it can be pulled on by children or tripped over accidentally.

**Wiring Requirements**
1. The oven must be operated on a SEPARATE CIRCUIT. No other appliance should share the circuit with the microwave oven. If it does, the branch circuit fuse may blow or the circuit breaker may trip.
2. The oven must be plugged into at least a 20 A, 120 V, 60 Hz GROUNDED OUTLET. Where a standard two-prong outlet is encountered, it is the personal responsibility and obligation of the consumer to have it replaced with a properly grounded three-prong outlet.
3. The VOLTAGE used must be the same as specified on this microwave oven (120 V, 60 Hz). Using a higher voltage is dangerous and may result in a fire or oven damage. Using a lower voltage will cause slow cooking. Panasonic is NOT responsible for any damages resulting from the use of the oven with any voltage other than specified.

---

**TV / RADIO / WIRELESS EQUIPMENT INTERFERENCE**
This product has been tested and found to comply with the limits for Microwave Oven, pursuant to Part 18 of the FCC Rules. This product can radiate radio frequency energy, which could cause interference to such products as radio, TV, baby monitor, cordless phone, Bluetooth, wireless router, etc., which can be confirmed by turning this product off and on. If present, the user is encouraged to try to correct by taking one or more of the following countermeasures:
- (1) Increase the spacing distance between the microwave oven and other product receiving the interference.
- (2) If possible, use a properly installed receiver antenna and/or reorient the receiving antenna of the other product receiving the interference.
- (3) Plug the microwave oven into a different outlet from the other product receiving the interference.
- (4) Clean door and sealing surfaces of the oven. (See Care and Cleaning of Your Microwave Oven)
Follow these Safety Precautions when cooking in your oven.

IMPORTANT
Proper cooking depends upon the power, the time setting and quantity of food. If you use a smaller portion than recommended but cook at the time for the recommended portion, fire could result.

1) HOME CANNING / STERILIZING / DRYING FOODS / SMALL QUANTITIES OF FOODS
- **DO NOT** use your oven for home canning. Your oven cannot maintain the food at the proper canning temperature. The food may be contaminated and then spoil.
- **DO NOT** use the microwave oven to sterilize objects (baby bottles, etc.). It is difficult to keep the oven at the high temperature needed for sterilization.
- **DO NOT** dry meats, herbs, fruits or vegetables in your oven. Small quantities of food or foods with low moisture content can dry out, scorch or catch on fire if overheated.
- **DO NOT** prepare small food portions at high power. This can cause energy concentration at a fixed spot, which can lead to arcing and damage to your oven. Select a lower cook power setting when preparing small portions.

2) POPCORN
Popcorn may be popped in a microwave oven corn popper. Microwave popcorn that pops in its own package is also available. Follow popcorn manufacturers’ directions and use a brand suitable for the cooking power of your microwave oven. CAUTION: When using pre-packaged microwave popcorn, you can follow recommended package instructions or use the Popcorn menu (refer to page 34). Otherwise, the popcorn may not pop adequately or may ignite and cause a fire. Never leave the oven unattended when popping popcorn. Allow the popcorn bag to cool before opening, and always open the bag facing away from your face and body to prevent steam burns.

3) DEEP FAT FRYING
- **DO NOT** deep fat fry in your microwave oven. Cooking oils may burst into flames and may cause damage to the oven and may result in burns. Microwave utensils may not withstand the temperature of the hot oil, and can shatter or melt.

4) FOODS WITH NONPOROUS SKINS
- **DO NOT** cook or reheat whole eggs, with or without the shell. Steam buildup in whole eggs may cause them to explode, and possibly damage the oven or cause injury. Reheating SLICED hard-boiled eggs and cooking SCRAMBLED eggs is safe.
- **Potatoes, apples, whole squash and sausages** are examples of foods with nonporous skins. These types of foods must be pierced before microwave cooking to prevent them from exploding. CAUTION: Cooking dry or old potatoes can cause fire.

5) GLASS TRAY / COOKING CONTAINERS / FOIL
- Cooking containers get hot during microwaving. Heat is transferred from the HOT food to the container and the Glass Tray. Use pot holders when removing containers from the oven or when removing lids or plastic wrap covers from cooking containers, to avoid burns.
- The Glass Tray will get hot during cooking. It should be allowed to cool before handling or before paper products, such as paper plates or microwave popcorn bags, are placed in the oven for microwave cooking.
- When using foil in the oven, allow at least 1-inch (2.5 cm) of space between foil and interior oven walls or door.
- Dishes with metallic trim should not be used, as arcing may occur.

6) PAPER TOWELS / CLOTHS
- **DO NOT** use paper towels or cloths that contain a synthetic fiber woven into them. The synthetic fiber may cause the towel to ignite. Use paper toweling under supervision.

7) BROWNING DISHES / OVEN COOKING BAGS
- Browning dishes or grills are designed for microwave cooking only. Always follow instructions provided by the manufacturer. **DO NOT** preheat browning dish more than six minutes.
- If an oven cooking bag is used for microwave cooking, prepare according to package directions. **DO NOT** use a wire twist-tie to close bag. Instead use plastic ties, cotton string or a strip cut from the open end of the bag.
8) THERMOMETERS
- DO NOT use a conventional meat thermometer in your oven. Arcing may occur. Microwave safe thermometers are available for both meat and candy.

9) BABY FORMULA / BABY FOOD
- DO NOT heat baby formula or baby food in the microwave oven. The glass jar or surface of the food may appear warm while the interior can be so hot as to burn the infant’s mouth and esophagus.

10) REHEATING PASTRY PRODUCTS
- When reheating pastry products, check temperatures of any fillings before eating. Some foods have fillings, which heat faster and can be extremely hot, while the surface remains warm to the touch (for example, jelly donuts).

11) GENERAL OVEN USAGE GUIDELINES
- DO NOT use the oven for any purpose other than the preparation of food. This oven is specifically designed to heat or cook food.
- Before use, check that utensils/containers are suitable for use in microwave ovens.
- DO NOT attempt to use this microwave oven to dry newspaper, clothing or any other materials. They may catch fire.
- When the oven is not being used, DO NOT store any objects other than oven accessories inside the oven in case it is accidentally turned on.
- The appliance shall not be operated by Microwave or Combo WITHOUT FOOD IN THE OVEN.
- Operation in this manner may damage the appliance.
- If smoke or a fire occurs in the oven, press the Stop/Reset button and leave the door closed in order to extinguish the flames. Disconnect the power cord, or shut off power at the fuse.
- Extreme caution must be used when moving hot liquids.
- When handling cooking containers take care not to let the contents spill.
- Avoid hot steam, serious burns and scalds could result.
- To prevent injury, do not allow anyone to lean, hang, sit or place heavy items on the open door of the appliance. Severe personal injury could result.
- Do not use a steam cleaner to clean this appliance. The steam from the cleaning appliance could penetrate live components and permanently damage the oven or cause injury.
- The use of accessories not recommended by Panasonic may cause injury.

12) HEATER OPERATION
- Exterior oven surfaces, including air vents on the cabinet and the oven door will get hot during Airfry, Convection, Combo or Broil functions. To prevent burns, take care when opening or closing the door and when inserting or removing food and accessories.
- The oven has heaters situated in the top of the oven. During and after using either the Airfry, Convection, Combo or Broil functions, all inside surfaces of the oven will be very hot. To prevent burns, care should be taken to avoid touching the inside surfaces of the oven.
- TO AVOID THE RISK OF SCALDING, please use caution when touching accessible parts when oven is operated in Convection, Combo or Broil mode, because the accessible parts may become extremely hot.

13) BEFORE USING YOUR OVEN
- Before using the oven for the first time, wipe excessive oil off in the oven cavity and operate the oven without food and accessories on Convection at 425 °F (220 °C), for 10 minutes. This will allow the oil that is used for rust protection to be burned off. This is the only time the oven is used empty. (with the exception of preheating on Convection.)

* Check manufacturers’ recommendation, must withstand heat or follow the recipe instructions.

CONTAINER TEST
TO TEST A CONTAINER FOR SAFE MICROWAVE OVEN USE: Fill a microwave safe cup with cool water and place it in the microwave oven along side the empty container to be tested. **Heat one (1) minute at 1000 W (HIGH).** If the container is microwave oven safe (transparent to microwave energy), the empty container should remain comfortably cool and the water should be hot. If the container is hot, it has absorbed some microwave energy and should NOT be used. This test cannot be used for plastic containers.
1. **Oven Window**
2. **Door Safety Lock System**
3. **Door Release Button**
   Push to open the door. Opening the door during cooking will stop the cooking process without cancelling the program. Cook resumes as soon as the door is closed and Start is pressed. It is quite safe to open the door at any time during a cooking program and there is no risk of Microwave exposure.
4. **External oven air vents**
5. **Glass Tray**
   a. **DO NOT** operate the oven without the roller ring and glass tray in place.
   b. Only use the glass tray specifically designed for this oven. Do not substitute any other glass tray.
   c. If the glass tray is hot, allow to cool before cleaning or placing in water.
   d. **DO NOT** cook directly on the glass tray. Always place food on a microwave-safe dish, or on a rack set in a microwave-safe dish.
   e. If food or utensil on the glass tray touches oven walls, causing the tray to stop moving, the tray will automatically rotate in the opposite direction. This is normal.
   f. Glass tray can rotate in either direction.
   g. Always place the container on the center of glass tray when cooking.
6. **Roller Ring**
   a. Roller ring should be cleaned regularly to avoid excessive noise.
   b. Roller ring and glass tray should be used at the same time.
7. **Broil and Convection Heater**
8. **Waveguide Cover (do not remove)**
9. **Menu Label**
10. **Caution Label (hot surfaces)**
11. **Warning Label**
12. **Control Panel**
13. **Power Supply Cord**
14. **Power Supply Plug**
15. **Enamel Tray**
   a. The enamel tray is for cooking on Airfry, Broil, Convection and Combo. Do not use enamel tray in Microwave mode only.
   b. The enamel tray must always be in place on the glass tray (unless stated).
   c. Take it out with thermal insulation gloves after use. To avoid scalding, do not touch it with your hands.
16. **Wire Rack (with spacers)**
   a. A wire rack is included with the oven in order to facilitate browning of small dishes.
   b. Wire rack should be cleaned regularly.
   c. When using wire rack in the manual Airfry, Broil, Convection and Combo cooking modes, be careful to choose heat-proof containers; containers made of plastic or paper may melt or burn when exposed to the heat radiating from the Broil.
   d. When using the Combo mode, never place any aluminum or metal container directly on wire rack. Always insert a glass plate or dish between wire rack and the aluminum container. This will prevent sparking that may damage the oven.
   e. Do not use wire rack when cooking in the MICROWAVE mode only.
   f. Spacers: Do not remove when cooking.
17. **Oven Light**
   Oven Light will turn on during cooking and also when door is opened.
18. **Warning Label**
19. **DHHS Label**
20. **Airfry Basket**
   The Airfry Basket is for Airfry function.
   The Airfry Basket must always be in place on the wire rack on Enamel tray, and glass tray (unless stated).
21. **Function Label**
22. **Identification Plate**

**Notes:**
1. The above illustration is for reference only.
2. The glass tray, wire rack, enamel tray and airfry basket are the only accessories with this oven. All other cooking utensils mentioned in this manual must be purchased separately.
## Oven Accessories

The following chart shows correct use of the accessories in the oven.

**Mode**

- **Microwave**: Used with Glass Tray and Enamel Tray, not with Wire Rack or Airfry Basket.
- **Broil**: Used with Glass Tray, Enamel Tray, and Wire Rack.
- **Airfry**: Used with Glass Tray, Enamel Tray, and Wire Rack.
- **Convection**: Used with Glass Tray, Enamel Tray, and Wire Rack.

**Combo**

- **Combo 1 (Broil + Microwave)**: Used with Glass Tray, Enamel Tray, and Wire Rack.
- **Combo 2 (Convection + Microwave)**: Used with Glass Tray, Enamel Tray, and Wire Rack.
Beep Sound:
When a Button is pressed correctly, a beep sound will be heard. If a Button is pressed and no beep is heard, the unit did not or could not accept the instruction. The oven will beep twice between programmed stages. The oven will beep three times after preheating. At the end of any completed program, the oven will beep 5 times.

Note:
If an operation (except “One Push Reheating”) is set and Start is not pressed, after 6 minutes, the oven will automatically cancel the operation. This display will revert back to clock or colon mode.
Display Window

To help you operate the oven conveniently, the present state will appear in the display window.

- Preheating
- Child Safety Lock Setting
- Time (Minute/Second)
- Popcorn Display
- Defrost Mode/Frozen Food Mark
- 3-Stage Display
- Convection Mode
- Broil Mode
- Microwave Mode
- Wire Rack
- Temperature
- Number/Character
- Weight
- Beverage
- Auto Cook Program
- Sensor Cook Program
- More/Less
- Enamel Tray

Note: When cooking time is longer than 60 minutes, the time will appear in hours and minutes.

Dial Feature

1. **Time (Cooking time)**
   - After selecting a manual cooking mode, enter time by turning the dial. Use the dial for the Add Time function (page 30).

2. **Defrost/Auto Cook (Defrost, Auto/Sensor Cook, Steam Clean)**
   - When clock mode is displayed, turn the dial to select auto programs and weight (pages 33-41).
   - Steam Clean: This Program is to clean the cavity and remove any food odour from the microwave oven (page 42).

3. **Start/Select (Confirmation)**
   - Press the dial to start operating the oven or confirm the setting. If during cooking the door is opened or Stop/Reset is pressed once, Start has to be pressed again to continue cooking.

4. **Sensor Reheat (One Push Reheating)**
   - When Clock mode is displayed, press dial for quick start reheating chilled meal (page 32).
**Cooking Modes**

The diagrams shown below are examples of the accessories. It may vary depending on recipe/dish used.

Using the Microwave for the First Time

Plug into a properly grounded electrical outlet. "WELCOME TO PANASONIC REFER TO OWNER’S MANUAL BEFORE USE" scrolls across display window.

Function Features

This unique function of your Panasonic microwave oven allows you to establish the initial non-cooking features of your Oven. This microwave oven has the functions below:

- WEIGHT/TEMPERATURE UNITS CHOICE
- LANGUAGE CHOICE
- BEEP CHOICE

Plug into a properly grounded electrical outlet.

NOTES:

1. These choices can be selected only when you plug-in the oven.
2. Press Stop/Reset, it will revert to initial mode ("":").
3. After setting, it will revert back to Weight/Temperature Units Choice setting if Start is pressed again, press Stop/Reset to exit.

1. WEIGHT/TEMPERATURE UNITS CHOICE: The oven has a choice of Metric Units or Imperial Units display.

Press Start (Dial) once. "LB-F/KG-C" scrolls across display window.

Select the "LB-F" or "KG-C" by pressing Timer/Clock.
The default weight unit is LB-F.

2. LANGUAGE CHOICE: The oven has a choice of English, French or Spanish display.

Press Start (Dial) twice. "LANGUAGE" scrolls across display window.
The default language is English.

Select the language by pressing Timer/Clock.

- Once: French
- Twice: Spanish
- 3 times: English

3. BEEP CHOICE: The oven has both Beep On and Beep Off mode.

Press Start (Dial) 3 times. "BEEP ON/OFF" scrolls across display window.
The default mode is Beep ON.

Press Timer/Clock once. The mode changes to Beep OFF.

3. After setting, press Stop/Reset to exit.
Demo Mode

1. When "DEMO MODE PRESS ANY KEY" or "D" appears in the display window, it means the oven is under demonstration mode, microwave does not emit. Demo mode is designed for retail store display. In this mode, the oven can be demonstrated with no cooking power in the oven.

NOTES:
1. To set Demo Mode, repeat step 1-3.
2. Default mode is Demo Mode off.

Menu Action ON/OFF

This feature helps you to program your oven by prompting the next step to be taken. When you become familiar with your oven, the prompt can be turned off. This feature can be selected when colon or clock appears in the display window.

To turn ON/OFF:

Press Timer/Clock 4 times to turn Menu Action ON/OFF. The default setting is Menu Action ON.

NOTES:
This function only can be operated when word prompt turns on.

To cancel:
Press Microwave once, Start 4 times and Stop/Reset 4 times.

Step 1.

Step 2.

Step 3.
Operation (continued)

### Setting the Clock

1. With the oven NOT cooking, press **Timer/Clock** twice; the colon will blink.
2. Set time of day by turning dial. Time appears in the display window; colon continues flashing.
3. Press **Timer/Clock** to finish setting and the colon (:) will stop blinking.

**NOTES:**
1. To reset the clock, repeat steps.
2. The clock will retain the time of day as long as the oven is plugged in and electricity is supplied.
3. The clock is a 12-hour display.
4. Oven will not operate while colon (:) is flashing.

### Setting the Child Safety Lock

1. When the colon or time of day appears in the display, press **Stop/Reset** three times; " Child Safety Lock will be cancelled.

**NOTES:**
1. This feature prevents the electronic operation of the oven until cancelled. It does not lock the door.
2. To set or cancel Child Safety Lock, **Stop/Reset** button must be pressed 3 times within 10 seconds.
3. You can set Child Safety Lock feature when the display shows a colon or time of day.
**Airfry**
The Airfry function combines intense heat and maximized airflow to cook food crispy and brown. No need to set temperature and preheating, turn the Dial to set the cooking time up to 9 hours after selecting Airfry function.

1. **Press** Airfry/Broil/Combo button once.

2. **Set desired cooking time by turning dial (up to 9 hours).**

3. **Press dial to Start**, the cooking will start and the time will count down in the display. At the end of cooking, five beeps will sound.

**NOTES:**
1. Ensure to use the proper accessories. Put the food on the Airfry Basket on the Wire Rack on the Enamel Tray for dripping oil. DO NOT remove the spacer on the Wire Rack.
2. Arrange food evenly in the Airfry Basket. For best results, place food in a single layer and leave space between pieces. For large amount of food, stir or re-arrange the food several times during cooking.
3. When the selected cooking time is less than one hour, the time counts down second by second.
4. When the selected cooking time is over one hour, the time counts down minute by minute until only “1H 00” (1 hour) remains. The display then indicates minutes and seconds and counts down second by second.

**CAUTION:**
Food, accessories and the surrounding oven will get very hot. Use oven mitts.
## Operation (continued)

Operation (continued)

**Broil**

**Directions for Broiling:**
There are two power levels for Broil. When broiling, heat is radiated from heater. The Broil is especially suitable for thin slices of meat and seafood as well as bread and meals. Preheating isn’t required before broiling. Select Broil setting, set the time and start the oven. The food being broiled should normally be turned over after half the broiling time. When the oven door is opened, the program is interrupted. Turn the food over, place it back the oven, close the door and restart oven. While broiling, the oven door can be opened at any time to check the food.

**Set desired cooking time by turning dial (up to 1 hour and 30 minutes).**

**Press Airfry/Broil/Combo** button until the desired power level appears in the display window.

<table>
<thead>
<tr>
<th>Press</th>
<th>Power level</th>
</tr>
</thead>
<tbody>
<tr>
<td>twice</td>
<td>Broil 1 (High)</td>
</tr>
<tr>
<td>3 times</td>
<td>Broil 2 (Low)</td>
</tr>
</tbody>
</table>

**Cooking Tips:**
1. Most meat items e.g. sausages, chops can be cooked on the hottest setting - Broil 1 (High). This setting is also suitable for toasting bread, muffins and teacakes etc.
2. Broil 2 (Low) used for more delicate foods or those that require a longer broil time e.g. fish or chicken portions.

**NOTES:**
1. There is no microwave power on the Broil only program.
2. Use the accessories provided, as explained.
3. The Broil will only operate with the oven door closed.
4. Do not preheat the broil.
5. Never cover the food when broiling.
6. After broiling it is important that the broil accessories are removed for cleaning before reuse and that the oven walls and floor are wiped with a cloth squeezed in hot soapy water to remove any grease.

**CAUTION:**
Food, accessories and the surrounding oven will get very hot. Use oven mitts.

**Oven accessories to use**
When broiling foods the glass tray should be in position, with the enamel tray and the wire rack on top. Place food on wire rack on the enamel tray on the glass tray. The wire rack will allow fat to drip through into the enamel tray to reduce excess splatter and smoke when broiling steaks, chops and other fatty foods. If broiling fish or small items, place the enamel tray on top of the wire rack.
**Combo 1 (Casserole)**

This function is suitable for cooking casserole dishes. The cooking power combines microwave and broil. Follow the recommended recipes and cooking time on the next page, use microwaveable dishes, and cook without lids. For other recipe of casserole, please set cooking time as you desired.

<table>
<thead>

<td>20-22</td>
<td>-</td>
</tr>
</tbody>
</table>

**NOTES:**

1. Food is usually cooked uncovered.
2. The wire rack and enamel tray are designed to be used for Combo and broiling. Never attempt to use any other metal accessory except the one provided with the oven. Place the enamel tray underneath to catch any fat or drips.
3. Do not use plastic microwave containers on Combo programs. Dishes must be able to withstand the heat of the top heater. Do not put dishes on wire rack directly under the heater, use the enamel tray.
4. When the selected cooking time is less than one hour, the time counts down second by second.
5. When the selected cooking time is over one hour, the time counts down minute by minute until only “1H 00” (1 hour) remains. The display then indicates minutes and seconds and counts down second by second.
6. To turn food just press the door release, take out the enamel tray and wire rack, turn the food, return to the oven, close the door and press dial to Start. The oven will continue to count down the remaining cooking time.
7. Foods should always be cooked until browned and piping hot.
8. After cooking it is important that the accessories are removed for cleaning before re-use and that the oven walls and floor are wiped with a cloth squeezed in hot soapy water to remove any grease.
Casserole Recipes

**Macaroni and cheese (4-6 servings)**

- 2½ tbsp. (40 g) butter
- 1½ tbsp. (25 g) chopped onion
- ½ clove minced garlic
- 4 tbsp. (60 g) all-purpose flour
- ⅓ tsp. (2.5 g) dry mustard
- ⅓ tsp. (2.5 g) salt
to taste ground black pepper
- 1½ cups (375 ml) milk
- 1½ cups (300 g) grated cheddar cheese
- 5 oz. (140 g) (dry weight) macaroni, cooked and drained
- 3 tbsp. (45 g) bread crumbs
- ⅓ tsp. (2.5 g) paprika

In a 3-quart casserole dish, melt the butter for 20 seconds at 1000 W. Add onion and garlic, and cook for 1 minute at 1000 W. Stir in flour, mustard, salt and pepper, and gradually add the milk. Cook for 4-5 minutes at 1000 W until sauce thickens, stir once. Add the cheddar cheese and the macaroni into the sauce and stir well. Sprinkle the bread crumbs and paprika on the top of the dish. Cook uncovered at “Combo 1” for 25-30 minutes, let stand for 10 minutes.

**Potato casserole (4-6 servings)**

- 1½ lb. (750 g) potatoes, peeled and sliced
- ½ cup (125 ml) sour cream
- ½ cup (125 ml) milk
- 3 green onions, finely chopped
- 1 small onion, thinly sliced
- ¼ cup (50 g) parmesan cheese
- 2 bacon slices, finely chopped

In a 3-quart casserole dish, layer potatoes, sour cream and onions. Top with cheese and bacon. Pour milk on the top. Put the casserole dish on the glass tray and cook uncovered at “Combo 1” for 35-40 minutes. Stand, covered, 5-10 minutes before serving.

**Beef and Macaroni casserole (4-6 servings)**

- 8 oz. (225 g) lean ground beef
- ½ small onion, chopped
- ¼ green bell pepper, chopped
- ½ cup (110 g) chopped celery
- 15 oz. (430 g) can tomato sauce
- ½ cup (150 ml) water
- ½ cup (110 g) uncooked elbow macaroni
- ½ tsp. (2 g) parsley
- ¼ tsp. (1 g) salt
to taste grounded black pepper
- ¼ cup (50 g) grated cheddar cheese

In a 3-quart casserole dish, combine all ingredients except potato chips, mix well. Put the casserole dish on the glass tray and cook uncovered at “Combo 1” for 30-35 minutes. Stir occasionally during cooking. Top with potato chips. Stand, uncovered, 3-5 minutes.

**Tuna casserole (4-6 servings)**

- 6½ oz. (180 g) can tuna, drained and flaked
- 4 cups (1 L) pasta, cooked and drained
- 10 oz. (280 g) can condensed cream of mushroom soup
- 4 oz. (120 g) can of sliced mushrooms, drained
- 10 oz. (280 g) package of frozen peas, defrosted
- ¾ cup (175 ml) milk
- 2 tbsp. (25 g) pimento, chopped
- 1 cup (250 g) crushed potato chips

In a 3-quart casserole dish, combine all ingredients except potato chips, mix well. Put the casserole dish on the glass tray and cook uncovered at “Combo 1” for 35-40 minutes. Stir occasionally during cooking. Top with potato chips. Cover and let stand 5 minutes.
Operation (continued)

Convection Bake

The oven can be used as a conventional oven using the Convection mode which incorporates a heating element with a fan. There is a choice of Convection temperatures 100 °F (40 °C) and 215 °F (100 °C) - 425 °F (220 °C). For quick selection of the most commonly used cooking temperatures, the oven starts at 300 °F (150 °C) and then for each press the temperature will count up in 18 °F (10 °C) stages to 425 °F (220 °C), then to 100 °F (40 °C), 215 °F (100 °C), 230 °F (110 °C) etc. This feature provides 2 modes to select. For best results always place food in a preheated oven.

<table>

</tr>
</tbody>
</table>

With Preheating:

1. Press Convection Bake until the desired temperature appears in the display window.
2. Set desired cooking time by turning dial (up to 9 hours).
3. Press dial to Start. The cooking time appears in the display window and begins to count down.

NOTES:
1. * Open the door using the door release button, because if the Stop/Reset button is pressed the program may be cancelled.
2. When preheating, the screen displays the actual temperature of the oven cavity. The current temperature is not displayed until more than 215 °F (100 °C) is reached. To change the temperature during cooking, press the Convection Bake button.
3. The oven will maintain the selected preheated temperature for approximately 30 minutes without the door opened. If no food has been placed inside the oven or a cooking time set, then it will beep 5 times and automatically cancel the cooking program and revert to colon or time of day.
4. Once you open the door and Start is not pressed, after 6 minutes, the oven will automatically cancel the preheated program. This display will revert back to clock or colon mode.
5. The oven cannot preheat to 100 °F (40 °C).
Operation (continued)

Convection Bake
Without Preheating:
(100 °F (40 °C) is available in Convection without preheating.)

1

Press **Convection Bake** until the desired temperature appears in the display window.

2

Set desired cooking time by turning dial. (up to 9 hours).

3

Press dial to **Start**. The cooking time appears in the display window and begins to count down.

**NOTES:**
1. When the selected cooking time is less than one hour, the time counts down second by second.
2. When the selected cooking time is over one hour, the time counts down minute by minute until only “1H 00” (1 hour) remains. The display then indicates minutes and seconds and counts down second by second.

**Oven accessories to use**
When using the Convection oven the glass tray should be in position and must have the enamel tray placed on top. The food is then placed onto the enamel tray. Follow your individual recipe guidelines. When using the oven as a Convection oven, there is NO MICROWAVE POWER, i.e. the oven is operating as a conventional oven and you can use all your standard metal baking tins and ovenware. It is not recommended to cook on more than one level when using the Convection oven. When cooking 2 trays of buns etc, cook in two batches.

**CAUTION:**
Food, accessories and the surrounding oven will get very hot. Use oven mitts.
Microwave

This feature allows you to set the desired power and time to cook food. Do not place food directly on the glass tray. Use microwave safe dishes, plates or bowls covered with a lid or pierced cling film.

1. Press Microwave until the desired power level appears in the display. 1000 W is the highest and 100 W is the lowest.

<table>
<thead>
<tr>
<th>Press</th>
<th>Power level</th>
</tr>
</thead>
<tbody>
<tr>
<td>once</td>
<td>1000 W (HIGH)</td>
</tr>
<tr>
<td>twice</td>
<td>800 W (MED-HIGH)</td>
</tr>
<tr>
<td>3 times</td>
<td>600 W (MEDIUM)</td>
</tr>
<tr>
<td>4 times</td>
<td>440 W (MED-LOW)</td>
</tr>
<tr>
<td>5 times</td>
<td>300 W (DEFROST)</td>
</tr>
<tr>
<td>6 times</td>
<td>100 W (LOW)</td>
</tr>
<tr>
<td>7 times</td>
<td>KEEP WARM</td>
</tr>
</tbody>
</table>

2. Set cooking time by turning dial. 1000 W and KEEP WARM have max. cooking time of 30 minutes. For other power levels, the max. time is 1 hour and 30 minutes.

3. Press dial to Start; the cooking will start and the time will count down in the display. At the end of cooking, five beeps will sound.

NOTES:
1. Opening the door and taking out the defrosted parts during the operating time is recommended. Turn over, stir or rearrange the parts which are still in icy.
2. When the selected cooking time is less than one hour, the time counts down second by second.
3. When the selected cooking time is over one hour, the time counts down minute by minute until only “1H 00” (1 hour) remains. The display then indicates minutes and seconds and counts down second by second.

DO NOT OVERCOOK:
This oven requires less time to cook than older units. Overcooking will cause food to dry out and may cause a fire. A microwave oven’s cooking power tells you the amount of microwave power available for cooking.

Caution:
DO NOT defrost food at a high power setting. Doing so can cause energy concentration at a focused point, which can lead to arcing and damage to the oven. Use the “Defrost” function instead.
**Keep Warm**
(Will keep “cooked” food warm for up to 30 minutes after cooking)

1. Press **Microwave** 7 times to select the KEEP WARM.

2. Set warming time by turning dial (up to 30 minutes). Set 20 minutes cooking for an example.

3. Press dial to **Start**, the cooking will start and the time will count down in the display. At the end of cooking, five beeps will sound.

**NOTES:**
KEEP WARM can be set as the final stage after cook time has been manually entered. It cannot be used with auto programs (such as Defrost, Sensor Reheat, Auto/Sensor Cook and Steam Clean).

**Quick 30**
(Set or add cooking time in 30 seconds increments)

1. Press **Quick 30** until the desired cooking time (up to 5 minutes) appears in the display. Power level is pre-set at 1000 W.

2. Press dial to **Start**; the cooking will start and the time will count down in the display. At the end of cooking, five beeps will sound.

**NOTES:**
- If desired, you can use other power levels. Select desired power level before pressing **Quick 30**.
- After setting the time by **Quick 30** button, you cannot use the **Dial**.
- **Quick 30** button can also be used to add more time during manual cooking.
- It cannot be used with auto programs (such as Defrost, Sensor Reheat, Auto/Sensor Cook and Steam Clean).

- Quick 30 button can also be used to add more time during manual cooking.
- Quick 30 button can also be used to add more time during manual cooking.
Setting the Kitchen Timer

1. This feature allows you to program the oven as a kitchen timer. Press **Timer/Clock** once.

2. Set desired amount of kitchen time by turning dial (up to 1 hour and 30 minutes).

3. Press dial to **Start**. Time will count down without oven operating.

**NOTES:**
1. If the oven door is opened during Kitchen Timer, Standing Time, Delay Start, the time in the display window will continue to count down.
2. If the time exceeds one hour, it will count down in units of minutes. If less than one hour, the time will count down in units of seconds.
3. An "H" will appear in the display to denote hours.

**Caution:** If oven lamp is lit while using the timer feature with door closed, the oven is **NOT** set properly; STOP OVEN IMMEDIATELY and re-read instructions.
Setting a Standing Time

1. Some recipes call for a standing time after cooking. Press Microwave until the desired power level appears in the display. 1000 W is the highest and 100 W is the lowest.

2. Set desired standing time by turning dial (up to 1 hour and 30 minutes).

3. Press Timer/Clock once.

4. Set cooking time by turning dial (see previous page for maximum times).

5. Press dial to Start. Cooking will start. After cooking, standing time will count down without oven operating.

NOTES:
1. If the oven door is opened during Kitchen Timer, Standing Time, Delay Start, the time in the display window will continue to count down.
2. Standing Time and Delay Start can not be programmed together with auto programs (such as Defrost, Sensor Reheat, Auto/Sensor Cook and Steam Clean) and preheating. This is to prevent the starting temperature of food from rising before defrosting or cooking begins. A change is starting temperature could cause inaccurate results.
3. When using Standing Time or Delay Start, it is up to 2 power stages.
4. If the time exceeds one hour, it will count down in units of minutes. If less than one hour, the time will count down in units of seconds.
5. An “H” will appear in the display to denote hours.
Operation (continued)

Setting a Delayed Start

1. The start time can be delayed to start cooking at a later time. To do this, first press Timer/Clock once.

2. The time can be set by turning dial (up to 1 hour and 30 minutes).

3. Press Microwave until the desired power level appears in the display. 1000 W is the highest and 100 W is the lowest.

4. Set cooking time by turning dial (see previous page for maximum times).

5. Press dial to Start, the delay time will count down, then cooking will begin.

NOTES:

1. If the oven door is opened during Kitchen Timer, Standing Time, Delay Start, the time in the display window will continue to count down.
2. Standing Time and Delay Start can not be programmed together with auto programs (such as Defrost, Sensor Reheat, Auto/Sensor Cook and Steam Clean) and preheating. This is to prevent the starting temperature of food from rising before defrosting or cooking begins. A change is starting temperature could cause inaccurate results.
3. When using Standing Time or Delay Start, it is up to 2 power stages.
4. If the time exceeds one hour, it will count down in units of minutes. If less than one hour, the time will count down in units of seconds.
5. An "H" will appear in the display to denote hours.
Operation (continued)

Add Time
(Example: To add cooking time after Broil 1 (High).)

1. Set the desired cooking program, by entering cooking method and time required.

2. After cooking, "ADD TIME OR ENJOY YOUR MEAL" will appear in the display window.

3. Press dial to Start. Time will be added. The time in the display window will count down.

NOTES:
1. This feature is not available for auto programs (such as Defrost, Sensor Reheat, Auto/Sensor Cook and Steam Clean).
2. The Add Time function will be cancelled if you do not perform any operation within 1 minute after cooking.
3. The Add Time function can be used after the 3-stage cooking.
4. The power level is the same as the last stage.
Operation (continued)

3-Stage Setting
(Example: Continually set [800 W] 2 minutes, [Combo 2 (Frozen foods)] 3 minutes and [Broil 2 (Low)] 2 minutes.)

1. Press twice to select **800 W**.

2. Set as 2 minutes by turning dial.

3. Press 5 times to select **Combo 2** (Frozen foods).

4. Set as 3 minutes by turning dial.

5. Press 3 times to select **Broil 2** (Low).

6. Set as 2 minutes by turning dial.

7. Press dial to **Start**. The time will count down at the first stage in the display window.

**NOTES:**

1. When operating, two beeps will sound between each stage.
2. Auto programs (such as Defrost, Sensor Reheat, Auto/Sensor Cook and Steam Clean) and preheating cannot be used with 3-stage cooking.
3. Standing Time, Delay Start can be used with 3-stage cooking.
4. During cooking, one press on **Stop/Reset** stops the operation. You can re-start it by pressing **Start**. A second press of **Stop/Reset** will cancel the selected program.
5. Whilst not operating, one press of **Stop/Reset** cancels the selected program.

**Example to use:**
Mug cake (1 mug)

Sensor Reheat (One Push Reheating)

This unique feature ‘the Genius’ built-in sensor allows you to reheat a chilled meal with one push of the dial. It is not necessary to select the power level or cooking time. The built-in sensor measures the humidity of the food and calculates the cooking time.

<table>
<thead>
<tr>
<th>Program</th>
<th>Weight</th>
<th>Accessories</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sensor Reheat</td>
<td>8 - 36 oz.</td>
<td></td>
<td>All foods must be pre-cooked. Foods should be at refrigerator temperature approx. 41 °F (+ 5 °C). Reheat in microwaveable container as purchased. If transferring food to dish, cover with pierced plastic wrap. Press dial to Start. Stir at beeps. Stir again at end of program and allow a few minutes standing time. Large pieces of meat/fish in a thin sauce may require longer cooking.</td>
</tr>
</tbody>
</table>

One Push Reheating food chart:

<table>
<thead>
<tr>
<th>Suitable foods</th>
<th>Unsuitable foods</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-Cooked Dishes: Casserole, Stew, Leftover</td>
<td>Raw Foods: Vegetables, Meats, Rice</td>
</tr>
<tr>
<td>Chilled Meal, Entrée</td>
<td>Thicker Foods, cannot not be stirred: Lasagne, Shepherds Pie</td>
</tr>
<tr>
<td></td>
<td>Beverages: Water, Milk, Coffee</td>
</tr>
</tbody>
</table>

How it works

Once the One Push Reheating has been selected, the food is heated up. As food begins to get hot, steam is emitted. When the food reaches a certain temperature and begins to cook, an even greater amount of steam is released. The increase in steam emission is detected by a humidity sensor in the oven. This acts as a signal for the oven to calculate how much longer the food needs to cook. The remaining cooking time will appear in the display window after two beeps. Whilst the Sensor symbol is still flashing in the display window the oven door should not be opened. Wait until the cooking time appears in the window, and then open the door if required, to stir or turn the food.

Adjust to Taste

The One Push Reheating reheats a chilled meal for average tastes. You are able to adjust the reheating program to your own taste. After pressing Start, +/- symbol and flashing bar appears in the display, turn dial clockwise for more time or anticlockwise for less time. This operation should be completed within 14 seconds. Default mode is normal.

Notes:

1. Press the dial in two minutes right after the door was closed, otherwise One Push Reheating Function will be rejected and beeps will sound. Open the door and close it again will release the One Push Reheating Function.
2. The oven automatically calculates the reheating time or the remaining reheating time.
3. The door should not be opened before the time appears in the display window.
4. To prevent any mistakes during One Push Reheating ensure that glass tray and the container are dry.
5. The room temperature should not be more than 95 °F (35 °C) and not less than 32 °F (0 °C).
6. If the oven has previously been used and it is too hot to be used on One Push Reheating, “HOT INSIDE WAIT” will appear in the display window. After the “HOT INSIDE WAIT” disappears, the One Push Reheating may be used. If in a hurry, cook food manually by selecting the correct cooking mode and cooking time yourself.
NOTES:
1. Defrost can be used to defrost many cuts of meat, poultry and fish by weight. The oven will determine the defrosting time and power levels. Once the oven is programmed, the defrosting time will appear in the display. For best results the minimum recommended weight is 0.1 lb (0.1 kg). (see chart on page 36.)
2. Turn over the food, remove defrosted food and shield thin ends/fat bones of roast with foil when buzzer rings in the middle of cooking.
3. Allow standing time so that the center of the food thaws out. (Minimum of 1 hour for joints of meat and whole chickens).

Conversion
Follow the chart to convert ounces or hundredths of a pound into tenths of a pound. To use Defrost, enter the weight of the food in pounds (1.0) and tenths of a pound (0.1). If a piece of meat weighs 1.95 lbs or 1 lb 14 oz., enter 1.9 lbs.

Auto Cook (Sensor):
Popcorn (No.2)

1. If desires, More/Less adjustment can be done. Turn dial to add or subtract the cooking time (5 levels can be select), after turning the dial within 14 seconds.
2. Pop one bag at a time.
3. Place bag in oven according to manufacturers' directions.
4. Start with popcorn at room temperature.
5. Allow popped corn to sit unopened for a few minutes.
6. Open bag carefully to prevent burns, because steam will escape.
7. Do not reheat unpopped kernels or reuse bag.
8. If popcorn is of a different weight than listed, follow instructions on popcorn package.

To allow auto program operation, ensure the oven is in clock mode. Select the Popcorn by turning the dial. The weight is 1.5 - 3.2 oz. (42 - 90 g). (see chart on page 36.)

1. Press the dial to confirm the program.
2. Press dial to Start. The food category will be repeated in the display window until the oven calculates the cooking time after detecting a burst of steam. Do not open the oven door until the remaining cooking time appears in the display window.

NOTES:
1. If desires, More/Less adjustment can be done. Turn dial to add or subtract the cooking time (5 levels can be select), after turning the dial within 14 seconds.
2. Pop one bag at a time.
3. Place bag in oven according to manufacturers' directions.
4. Start with popcorn at room temperature.
5. Allow popped corn to sit unopened for a few minutes.
6. Open bag carefully to prevent burns, because steam will escape.
7. Do not reheat unpopped kernels or reuse bag.
8. If popcorn is of a different weight than listed, follow instructions on popcorn package.

10. If popping slows to 2 to 3 seconds between pops, stop oven. Overcooking can burn popcorn or cause fire.
11. When popping multiple bags one right after the other, the cooking time may vary slightly. This does not affect the popcorn results.
12. If the temperature of the cavity is too high, Sensor Cook feature cannot be used. The message “HOT INSIDE WAIT” will appears in the display window. Sensor Cook feature can be used again when the “HOT INSIDE WAIT” message disappears. Please open the door in order to cool the temperature of the cavity more quickly.
Operation (continued)

Auto Cook (Sensor): (No.3 - No.5)

1. To allow auto program operation, ensure the oven is in Clock mode. Select the desired menu by turning the dial. (see chart on the next page.)

2. Press the dial to confirm the program.

3. Press dial to Start. The food category will be repeated in the display window until the oven calculates the cooking time after detecting a burst of steam. Do not open the oven door until the remaining cooking time appears in the display window.

NOTES:
1. If desired, More/Less adjustment can be done. Turn dial to add or subtract the cooking time (3 levels can be select), after turning the dial within 14 seconds.
2. After having used the Sensor Cook feature a few times, you may decide you would prefer your food cooked to a different doneness – that is why you would like to turning the dial.
3. When steam is detected by the Genius Sensor and two beeps sound, the remaining cooking time will appear in the display.
4. Automatic features are provided for your convenience. If results are not suitable to your individual preference, or if serving size is other than what is listed in next page, please refer to manual cooking on page 25.
5. If the temperature of the cavity is too high, Sensor Cook feature cannot be used. The message “HOT INSIDE WAIT” will appear in the display window. Sensor Cook feature can be used again when the “HOT INSIDE WAIT” message disappears. Please open the door in order to cool the temperature of the cavity more quickly.

For the best results with the GENIUS SENSOR, follow these recommendations:

BEFORE Reheating/Cooking:
1. The room temperature surrounding the oven should be below 95 °F (35 °C).
2. Food weight should exceed 4 oz. (110 g).
3. Be sure the glass tray, the outside of the cooking containers and the inside of the microwave oven are dry before placing food in the oven. Residual beads of moisture turning into steam can mislead the sensor.
4. Cover food with lid, or with vented plastic wrap. Never use tightly sealed plastic containers—they can prevent steam from escaping and cause food to overcook.

DURING Reheating/Cooking:
DO NOT open the oven door until two beeps sound and cooking time appears in the display. Doing so will cause inaccurate cooking since the steam from food is no longer contained within the oven cavity. Once the cooking time begins to count down, the oven door may be opened to stir, turn or rearrange foods.

AFTER Reheating/Cooking:
All foods should have a standing time.
Operation (continued)

1. Defrost
This feature allows you to defrost minced meat, chops, chicken portions, meat joints. Foods should be placed in a suitable dish. Chops, chicken portions should be placed in a single layer. It is not necessary to cover the foods. Turn over or stir the food after beeps. Allow standing time so that the center of the food thaws out.

2. Popcorn
Pop one bag at a time. Place bag in oven according to manufacturers’ directions. Start with popcorn at room temperature. Allow popped corn to sit unopened for a few minutes. Open bag carefully to prevent burns, because steam will escape. Do not reheat unpopped kernels or reuse bag. If popcorn is of a different weight than listed, follow instructions on popcorn package.

3. Potatoes
Pierce each potato with a fork 6 times spacing around surface. Place potato or potatoes around the edge of paper-towel-lined glass tray, at least 1 inch (2.5 cm) apart. Do not cover. Turn at beeps. Let stand 5 minutes to complete cooking.

4. Steam Vegetables
All pieces should be the same size. Wash thoroughly, add 1 tbsp (15 ml) of water per ½ cup (125 ml) of vegetables, and cover with lid or plastic wrap. Pierce with a fork several times. Stir at beeps. Do not salt/butter until after cooking.

5. Fresh Fish
To cook fresh fillets or steaks of fish. Place fish in a suitable size container, add 2 tbsp (30 ml) water. Cover with lid or plastic wrap. Pierce with a fork several times.

</tbody>
</table>

6. Cream Cheese
Remove wrapper, cut cheese into 1 inch (3 cm) cube, and place in a microwave safe dish. Cover with plastic wrap.

7. Chocolate
Suitable for melting milk chocolate. Remove wrapper, separate chocolate into small pieces, and place in a microwave safe dish. Cook without cover. Stir after cooking.

8. Butter
Remove wrapper, cut butter into 1 inch (3 cm) cube, and place in a microwave safe dish. Cover with plastic wrap.
Auto Cook: Convection Bake/Combo (No.9 - No.16)

1. Press the dial to preheat the oven. "PREHEAT" will scroll across display window once then a "P" will appear in the display window. (Skip this step when preheating is not required)

2. After preheating, the oven will beep and "P END" will display in the display window. Open the door, put the food into the oven immediately and close the door.

3. Press the dial to confirm the program. (see chart below, for details on the next page.)

4. Press dial to Start. The time appears in the display window and begins to count down.

To allow auto program operation, ensure the oven is in clock mode. Select the desired menu by turning the dial. Press the dial to confirm the program.

Select the weight of the food by turning dial. (except Menu No.9, No.10 and No.14)

Press dial to Start. The time appears in the display window and begins to count down.

* With preheating  ** Without preheating

Refer to P39
9. Cake
Ingredient:
15 oz. (420 g) cake mix
3 eggs
4 oz. (110 g) vegetable oil
10 oz. (280 g) water

Method:
1. Beat cake mix, eggs, vegetable oil and water in a large bowl with electric mixer on low speed for 30 seconds, then on medium speed for 2 minutes.
2. Use the dial to set the program, then press Start to preheat the oven.
3. Pour cake batter into a 9 inch (23 cm) round and at least 2 inch (5 cm) deep cake pan with baking paper. Place cake pan on enamel tray.
4. After preheating, beeps sound and "P END" will flash in the display. Put the enamel tray on glass tray quickly and press the dial to Start. Cool for 10 minutes in pan and gently remove from pan onto wire rack to cool completely.

10. Cookie
Ingredient:
8½ oz. (240 g) cookie mix
1½ oz. (40 g) butter
1 oz. (25 g) egg wash

Method:
1. Stir cookie mix, butter and egg in a large bowl with a wooden spoon until just combined. Use your hands to form a soften dough.
2. Measure tablespoons of cookie dough and roll into balls. Place onto baking paper lined enamel tray, spacing about 2 inch (5 cm) apart.
3. Use the dial to set the program, then press Start to preheat the oven.
4. After preheating, beeps sound and "P END" will flash in the display. Put the enamel tray on glass tray quickly and press the dial to Start. Cool on tray for 10 minutes, then gently remove from tray onto a wire rack to cool completely.

11. Frozen Pizza
For reheating and browning frozen, purchased pizza. Remove all packaging and place pizza on wire rack on enamel tray on glass tray.

12. Fresh Pizza
Ingredients:
(9 inch)
6 oz. (150 g) fresh pizza dough
Extra oil for brushing
Toppings:
1 oz. (25 g) tomato sauce
2 oz. (55 g) pepperoni
2 oz. (55 g) shredded mozzarella cheese, or more to taste

(12 inch)
10 oz. (280 g) fresh pizza dough
Extra oil for brushing

13. Roast Chicken
1. Marinated the whole chicken for 30 minutes.
2. Use the dial to set the program, then press Start to preheat the oven.
3. After preheating, beeps sound and "P END" will flash in the display. Put the chicken on enamel tray on glass tray quickly and press the dial to Start. Turn it over at beeps.

14. Slow Cook/Stew
Beef curry casserole (6 servings)
Ingredient:
½ oz. (15 g) oil
1 large onion, chopped
1 large tomato, chopped
1 oz. (25 g) curry paste
1 tbsp. (15 g) flour
8 oz. (225 g) beef stock
36 oz. (1000 g) chuck steak, fat removed and cut into 1 inch (2.5 cm) cubes
1 tbsp. (15 g) vinegar

Place all ingredients in a 4-quart casserole dish. Put the microwave safe casserole on the glass tray. Uncovered. Stir at beeps.

15. Beef Rare
For cooking rare fresh roast beef (top side, rump or silver-side). Place the beef on the enamel on glass tray. Turn at beeps. Allow to stand for 10 to 20 minutes after cooking.

16. Beef Medium
For cooking medium fresh roast beef (top side, rump or silver-side). Place the beef on the enamel on glass tray. Turn at beeps. Allow to stand for 10 to 20 minutes after cooking.
Auto Cook:
Beverage (No.17 - No.18)
(Example: To reheat 1 cup milk.)

1. To allow auto program operation, ensure the oven is in clock mode. Select the desired menu by turning the dial. (see chart below)
2. Press the dial to confirm the program selection.
3. Select the weight of the food by turning dial.
4. Press dial to Start. The time appears in the display window and begins to count down.

<td>1 cup/2 cups (250/500 ml)</td>
<td>microwave safe cup</td>
<td>Directly on the glass tray</td>
</tr>
</tbody>
</table>

NOTES:
1. Use a microwave safe cup.
2. Heated Beverage can erupt if not mixed with air. Do not heat Beverage in your microwave oven without stirring before and halfway through heating.
3. Care must be exercised not to overheat Beverage. It is programmed to give proper result when heating 1 cup or 2 cups of Beverage, starting from room temperature for Tea/Coffee and refrigerator temperature for Milk/Hot Chocolate/Milky Coffee. Overheating will cause an increased risk of scalding, or water eruption. Refer to page 4, item 18.
Operation (continued)

Auto Cook:
Re-Bake Bread (No.19 - No.20)

1. To allow auto program operation, ensure the oven is in clock mode. Select the desired menu by turning the dial. (see chart below)

2. Press the dial to confirm the program.

3. Select the weight of the food by turning dial.

4. Press dial to Start. The time appears in the display window and begins to count down.

To re-bake pre-purchased baguettes and rolls from room temperature. Ensure height of baguette/rolls is no more than 2 inch (5 cm). Place baguette/crusty rolls on enamel tray on glass tray. After cooking place on a wire rack for a few minutes.

To re-bake pre-purchased croissants from room temperature. Place croissants on enamel tray on glass tray. After cooking place on a wire rack for a few minutes.

Auto Steam Clean: (No.21)

1. Place 1¼ cups (300 ml) tap water with 1 tbsp (15 ml) lemon juice in a microwaveable container (e.g. jug or bowl). Use a jug or bowl of at least 2 cups (500 ml) volume.

2. To allow auto program operation, ensure the oven is in clock mode. Select the desired menu by turning the dial. Press the dial to confirm the program.

3. Press dial to Start. The time appears in the display window and begins to count down. The program runs for 20 minutes.

4. Five beeps sound at the completion of the program. Open oven door and wipe the cavity and door area with a soft cloth.

NOTES:
1. This program is to clean the cavity and remove any food odour from the microwave oven.
2. Do not remove the glass tray and roller ring during this program.
3. To clean the glass tray and roller ring, refer to page 53.
4. Repeat the above procedure as required.
## Defrosting Tips & Techniques

### Preparation For Freezing:
1. Freeze meats, poultry, and fish in packages with only one or two layers of food. Place wax paper between layers.
2. Package in heavy-duty plastic wraps, bags (labeled “For Freezer”), or freezer paper.
3. Remove as much air as possible.
4. Seal securely, date, and label.

### To Defrost:
1. Remove wrapper. This helps moisture to evaporate. Juices from food can get hot and cook the food.
2. Set food in microwave safe dish.
3. Place roasts fat-side down. Place whole poultry breast-side down.
4. Select power and minimum time so that items will be under-defrosted.
5. Drain liquids during defrosting.
6. Turn over (invert) items during defrosting.

### After Defrosting:
1. Large items may be icy in the center. Defrosting will complete during Standing Time.
2. Let stand, covered, following standing time directions on page 28.
3. Rinse foods indicated in the chart.
4. Items which have been layered should be rinsed separately or have a longer standing time.

**Note:**
Always check that food is piping hot after reheating in the microwave. If unsure return to oven. Foods will still require a standing time, especially if they cannot be stirred. The denser the food the longer the standing time.
Bone and Fat
Both bone and fat affect cooking. Bones may cause irregular cooking. Meat next to the tips of bones may overcook while meat positioned under a large bone, such as a ham bone, may be undercooked. Large amounts of fat absorb microwave energy and the meat next to these areas may overcook.

Density
Porous, airy foods such as breads, cakes or rolls take less time to cook than heavy, dense foods such as potatoes and roasts. When reheating donuts or other foods with different centers be very careful. Certain foods have centers made with sugar, water, or fat and these centers attract microwaves (for example, jelly donuts). When a jelly donut is heated, the jelly can become extremely hot while the exterior remains warm to the touch. This could result in a burn if the food is not allowed to cool properly in the center.

Quantity
Two potatoes take longer to cook than one potato. As the quantity of the food decreases so does the cooking time. Overcooking will cause the moisture content in the food to decrease and a fire could result. Never leave microwave unattended while in use.

Shape
Uniform sizes heat more evenly. The thin end of a drumstick will cook more quickly than the meaty end. To compensate for irregular shapes, place thin parts toward the center of the dish and thick pieces toward the edge.

Size
Thin pieces cook more quickly than thick pieces.

Starting Temperature
Foods that are at room temperature take less time to cook than if they are chilled, refrigerated or frozen.
Cooking Techniques

Piercing
Foods with skins or membranes must be pierced, scored or have a strip of skin peeled before cooking to allow steam to escape. Pierce clams, oysters, chicken livers, whole potatoes and whole vegetables. Whole apples or new potatoes should have a 1-inch (2.5 cm) strip of skin peeled before cooking. Score sausages and frankfurters. Do not Cook/Reheat whole eggs, with or without the shell. Steam buildup in whole eggs may cause them to explode, and possibly damage the oven or cause injury. Reheating SLICED hard-boiled eggs and cooking SCRAMBLED eggs is safe.

Standing Time
Most foods will continue to cook by conduction after the microwave oven is turned off. After cooking meat, the internal temperature will rise 5 °F to 15 °F (3 °C to 8 °C), if allowed to stand, tented with foil, for 10 to 15 minutes. Casseroles and vegetables need a shorter amount of standing time, but this standing time is necessary to allow foods to complete cooking to the center without overcooking on the edges.

Browning
Foods will not have the same brown appearance as conventionally cooked foods or those foods which are cooked utilizing a browning feature. Meats and poultry may be coated with browning sauce, Worcestershire sauce, barbecue sauce or shake-on browning sauce. To use, combine browning sauce with melted butter or margarine and brush on before cooking. For quick breads or muffins, brown sugar can be used in the recipe in place of granulated sugar, or the surface can be sprinkled with dark spices before baking.

Test for Doneness
The same tests for doneness used in conventional cooking may be used for microwave cooking. Meat is done when fork-tender or splits at fibers. Chicken is done when juices are clear yellow and drumstick moves freely. Fish is done when it flakes and is opaque. Cake is done when a toothpick or cake tester is inserted and comes out clean.

Spacing
Individual foods, such as baked potatoes, cupcakes and appetizers, will cook more evenly if placed in the oven equal distances apart. When possible, arrange foods in a circular pattern.

Covering
As with conventional cooking, moisture evaporates during microwave cooking. Casserole lids or plastic wrap are used for a tighter seal. When using plastic wrap, vent the plastic wrap by folding back part of the plastic wrap from the edge of the dish to allow steam to escape. Loosen or remove plastic wrap as recipe directs for standing time. When removing plastic wrap covers, as well as any glass lids, be careful to remove them away from you to avoid steam burns. Various degrees of moisture retention are also obtained by using wax paper or paper towels.

Shielding
Thin areas of meat and poultry cook more quickly than meaty portions. To prevent overcooking, these thin areas can be shielded with strips of aluminum foil. Wooden toothpicks may be used to hold the foil in place. ▲ CAUTION is to be exercised when using foil. Arcing can occur if foil is too close to oven wall or door and damage to your oven will result.

Cooking Time
Cooking times will vary because of food shape variations, starting temperature, and regional preferences. Always cook food for the minimum cooking time given in a recipe and check for doneness. If the food is undercooked, continue cooking. It is easier to add time to an undercooked product. Once the food is overcooked, nothing can be done.

Stirring
Stirring is usually necessary during microwave cooking. Always bring the cooked outside edges toward the center and the less cooked center portions toward the outside of the dish.

Rearranging
Rearrange small items such as chicken pieces, shrimp, hamburger patties or pork chops. Rearrange pieces from the edge to the center and pieces from the center to the edge of the dish.

Turning
It is not possible to stir some foods to distribute the heat evenly. At times, microwave energy will concentrate in one area of the food. To help ensure even cooking, these foods need to be turned. Turn over large foods, such as roasts or turkeys, halfway through cooking.

Spacing

Spacing
Individual foods, such as baked potatoes, cupcakes and appetizers, will cook more evenly if placed in the oven equal distances apart. When possible, arrange foods in a circular pattern.

Shielding

Check foods to see that they are cooked to the United States Department of Agriculture’s recommended temperatures.

Cook all food to these minimum internal temperatures as measured with a food thermometer before removing food from oven. For reasons of personal preference, you may choose to cook food at higher temperatures.
Care and Cleaning of Your Microwave Oven

Please see below and the following page for particular cleaning instructions for each section of the oven.

BEFORE CLEANING: Unplug oven at wall outlet. If outlet is inaccessible, leave oven door open while cleaning.

AFTER CLEANING: Be sure to place the Roller Ring and the Glass Tray in the proper position and press Stop/Reset Button to clear the Display.

1. **Outside oven surfaces:** Clean with a damp cloth.
   To prevent damage to the operating parts inside the oven, water should not be allowed to seep into ventilation openings.

2. **Label:** Do not remove. Wipe with a damp cloth.

3. **Inside the Oven:** Wipe with a damp cloth after using. Mild detergent may be used if needed. Do not use harsh detergents or abrasives.

4. **Oven Door:** Wipe with a soft dry cloth when steam accumulates inside or around the outside of the oven door. During cooking, especially under high humidity conditions, steam is given off from the food. (Some steam will condense on cooler surfaces, such as the oven door. This is normal.) Inside surface is covered with a heat and vapor barrier film. **Do not remove.**

5. **Oven Cavity Floor:** Clean the bottom surface of the oven with mild detergent, water or window cleaner, and dry.

6. **Waveguide Cover:** Do not remove Waveguide Cover. **It is important to keep cover clean in the same manner as the inside of the oven. Failure to do so may damage the cover.**

7. **Control Panel:** If the Control Panel becomes wet, clean it with a soft dry cloth. Do not use harsh detergents or abrasives.
   For some models: The Control Panel is covered with a removable protective film to prevent scratches during shipping. Small bubbles may appear under this film, so if this is the case, remove by applying masking or clear tape to an exposed corner and pull gently.

8. **Glass Tray:** Remove and wash in warm soapy water or in a dishwasher.

9. **Roller Ring:** Roller Ring may be washed in mild soapy water or dishwasher. These areas should be kept clean to avoid excessive noise.

**AS WITH ANY COOKING APPLIANCE, MICROWAVE OVENS REQUIRE THE SAME LEVEL OF CARE TO PREVENT OVERHEATING OR DAMAGE. IT IS IMPORTANT TO KEEP THE OVEN CLEAN AND DRY. FOOD RESIDUE AND CONDENSATION MAY CAUSE RUSTING OR ARcing AND DAMAGE TO THE OVEN. AFTER USE, WIPE DRY ALL SURFACES, INCLUDING VENT OPENINGS, OVEN SEAMS, AND UNDER GLASS TRAY.**

**NOTES:**

1. After cooking, the oven should be cleaned with a soft cloth moistened with soapy water. If the oven is not cleaned occasionally to eliminate grease, it can accumulate and cause the oven to "Smoke" during use.

2. **DO NOT SPRAY DIRECTLY INSIDE THE OVEN.**
   A steam cleaner is not to be used for cleaning.

### Before Requesting Service

See below before calling for service, as most problems can easily be remedied by following these simple solutions:

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The oven causes TV interference.</td>
<td>Some radio, TV, Wi-Fi, cordless telephone, baby monitor, blue tooth or other wireless equipment interference might occur when you cook with the microwave oven. This interference is similar to the interference caused by small appliances such as mixers, vacuums, blow dryers, etc. It does not indicate a problem with your oven.</td>
</tr>
<tr>
<td>Steam accumulates on oven door and warm air comes from the oven vents.</td>
<td>During cooking, steam and warm air are given off from the food. Most of the steam and warm air are removed from the oven by the air which circulates in the oven cavity. However, some steam will condense on cooler surfaces such as the oven door. This is normal. After use, the oven should be wiped dry (see page 53).</td>
</tr>
<tr>
<td>Smoke and burnt smell will occur after the first use.</td>
<td>This is not a malfunction and will go away after a few uses.</td>
</tr>
<tr>
<td>Oven will not turn on.</td>
<td>The oven is not plugged in securely or needs to be reset; remove plug from outlet, wait ten seconds and re-insert. Main circuit breaker or main fuse is tripped or blown. Reset main circuit breaker or replace main fuse. There is a problem with the outlet; plug another appliance into the outlet to check if it is working.</td>
</tr>
<tr>
<td>Oven will not start cooking.</td>
<td>The door is not closed completely. Close the oven door securely. Start was not pressed after programming; Press dial to Start. Another program is already entered into the oven; press Stop/Reset to cancel the previous program and enter new program. The program is not correct; program again according to the Owner's manual. Stop/Reset has been pressed accidentally; program oven again.</td>
</tr>
<tr>
<td>The Glass Tray wobbles.</td>
<td>The Glass Tray is not positioned properly on the Roller Ring or there is food under the Roller Ring. Take out Glass Tray and Roller Ring. Wipe with a damp cloth and reset Roller Ring and Glass Tray properly.</td>
</tr>
<tr>
<td>When the oven is operating, there is noise coming from the Glass Tray.</td>
<td>The Roller Ring and oven bottom are dirty; clean these parts according to Care and Cleaning of Your Microwave Oven (see page 53).</td>
</tr>
<tr>
<td>The “ الغذائي” appears in the display window.</td>
<td>The CHILD SAFETY LOCK was activated by pressing Stop/Reset three times; Deactivate CHILD SAFETY LOCK by pressing Stop/Reset three times.</td>
</tr>
<tr>
<td>The oven stops cooking and “H00”, “H97” or “H98” appears in the display.</td>
<td>The oven’s power supply has failed; please contact an authorized Service Center (see next page).</td>
</tr>
<tr>
<td>“HOT INSIDE WAIT” appears in the display window.</td>
<td>The cavity is overheated. Operate again after it cools down. Please open the door in order to cool the temperature of the cavity more quickly.</td>
</tr>
<tr>
<td>“DEMO MODE PRESS ANY KEY” or “D” appears in the display window.</td>
<td>The oven is under demonstration mode. Press Microwave button once, Start 4 times and Stop/Reset button 4 times.</td>
</tr>

Panasonic Products Limited Warranty

Limited Warranty Coverage (For USA Only)

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Corporation (referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, (b) replace it with a new or a refurbished equivalent value product, or (c) refund your purchase price. The decision to repair, replace or refund will be made by the warrantor.

<table>
<thead>
<tr>
<th>Product or Part Name</th>
<th>Labor</th>
<th>Parts</th>

</thead>
<tbody>
<tr>
<td>ALL PARTS (EXCEPT MAGNETRON TUBE)</td>
<td>1 yr.</td>
<td>1 yr.</td>
</tr>
<tr>
<td>MAGNETRON TUBE</td>
<td>1 yr.</td>
<td>5 yr.</td>
</tr>
</tbody>
</table>

During the "Labor" warranty period there will be no charge for labor. During the "Parts" warranty period, there will be no charge for parts.

This warranty only applies to products purchased and serviced in the United States. This warranty is extended only to the original purchaser of a new product which was not sold "as is".

Mail-In Service – Online Repair Request

Online Repair Request

To submit a new repair request, and for quick repair status visit our Web Site at: http://shop.panasonic.com/support

When shipping the unit, carefully pack and send it in the original (or supplied) carton. Include a letter detailing the complaint along with the bill of sales and provide a daytime phone number where you can be reached. A valid registered receipt is required under the Limited Warranty.

When shipping Lithium Ion batteries please visit our web site at http://shop.panasonic.com/support, as Panasonic is committed to providing the most up to date information.

IF REPAIR IS NEEDED DURING THE WARRANTY PERIOD, THE PURCHASER WILL BE REQUIRED TO FURNISH A SALES RECEIPT/PROOF OF PURCHASE INDICATING DATE OF PURCHASE, AMOUNT PAID AND PLACE OF PURCHASE. CUSTOMER WILL BE CHARGED FOR THE REPAIR OF ANY UNIT RECEIVED WITHOUT SUCH PROOF OF PURCHASE.

Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER glass, plastic parts, temperature probes (if included) and normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, bug infestation, mishandling, misapplication, alteration, faulty installation, set-up adjustments, maladjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Service center or other Authorized Servicer, or damage that is attributable to acts of God.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY. (As examples, this excludes damages for lost time, travel to and from the servicer, loss of or damage to media or images, data or other memory or recorded content. The items listed are not exclusive, but for illustration only.) ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Service Center. If the problem is not handled to your satisfaction, then write to:

Panasonic Corporation of North America
Consumer Affairs Department 8th Fl.
Two Riverfront Plaza
Newark NJ 07102-5490

PARTS AND SERVICE, WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY, ARE YOUR RESPONSIBILITY.
